Goal Frequency User Interface

One-time goals will have a due date, but other frequency instances will inherit the Milestone end date. The "Before" setting was a way to set a time on the existing Events table so that reminders could go out based on date AND time.

One-time – user selects a due date and time for this single occurrence event

How often do you want to complete this goal?

One time ⌄

Before: 05:00 PM 🕐

Due date: MM-DD-YYYY

Private: ☐

Daily – user can select custom frequency in days and set a start date. The "Before" value will dictate at what point every day the goal is "due."

How often do you want to complete this goal?

Daily ⌄

Frequency: Every 1 day(s).

Before: 05:00 PM 🕐

Starting on: MM-DD-YYYY

Private: ☐

Weekly – user can select frequency of weeks, start date, and which days of the week the goal is due. Again, the "Before" time value is used for triggering notification and status of goal.

How often do you want to complete this goal?

Weekly	⌄

Frequency: Every | 1 | week(s).

On days: | Sun | Mon | Tue | Wed | Thu | Fri | Sat |

Before: | 05:00 PM | 🕐 |

Starting on: | MM-DD-YYYY |

Private: ☐

Monthly – user selects frequency of months, start date, and which particular generic month days the goal is due.

How often do you want to complete this goal?

Monthly	⌄

Frequency: Every | 1 | month(s).

On days:

1	2	3	4	5	6
7	8	9	10	11	12
13	14	15	16	17	18
19	20	21	22	23	24
25	26	27	28	29	30
31					

Before: | 05:00 PM | 🕐 |

Starting on: | MM-DD-YYYY |

Private: ☐

Yearly – user selects frequency of years, start date, and then the time of day for reminders and status.

How often do you want to complete this goal?

Yearly ▾

Frequency: Every 1 year(s).

Before: 05:00 PM 🕐

Starting on: MM-DD-YYYY
